

## LipoTone Cream

An innovative cream that combines reducing power, modeling action and a hydrolyzed collagen concentrate for visibly firmer and more toned skin. Natural oils of sweet almond and turmeric, together with plant extracts of echinacea, horsetail and hops, work synergistically to stimulate skin renewal and redensify the skin. Collagen helps to improve elasticity and firmness, reducing the appearance of critical areas and leaving the skin soft, smooth and harmoniously shaped.

### How to apply:

Apply to cleansed skin in circular motions from bottom to top, preferably morning and evening, focusing on the areas to be shaped. Massage until completely absorbed.
